

# Who is Lucas?

By: Lucas Heil

## Hi I identify as a human or terran

I'm here with my wife Kc and our cats Milo & Leia. The "kittens" are both about 1/2 of a year old. Kc & I just joyfully celebrated our 1st anaverssary on april 8th. We hail from the beutiful state of California in Costa Mesa half way between the beach and disneyland. So why would I move my family up here?

I came here to pursue a varitey of things. Though I'm a returned missionary my own testimony has always been challenged back in So cal. I come from a family that has mixed feelings about the church half love it some don't see the benefit" I came to BYU Idaho aka "Rexbuurrrrg" so I could provided a better life for us in a few diffrent ways.

- 1st I'm here to strengthen my testimony of the church and to be a light for my extended family. I know the priciples that are taught here can help us all find peace.
- 2nd I'm pursuing Computer Engineering as my major. It may change to electrical engineering but we'll see.
- 3rd I'm here to network and collaborate with You!!

I'm intereted in making some new friends and to explore this new world of computers. With that in mind what makes me Lucas? My hobbies and interesets of course! I love to play video games such as Minecraft, Terraria, Portal 1&2, anything to do with starwars, and most open world RPG's. I also enjoy bird watching, listening to Lofi, classic rock, anything peaceful or energizing, and playing amature hour pool. Growing up I played 12 years of baseball and 4 years of football and enjoy watching a game or 2 now. Between dogs and cats I grew up with 2 dogs and fell in love with cats on my mission so I think they are both great in aunique way. As a far as ice cream goes, anything that's creamy with little bits of chocolate in it tastes delicious.

If you havn't introduced yourself or are taking the world solo and want a friend just say hello. Thanks for taking the time!
